60% Energy Consumption **Reduction**
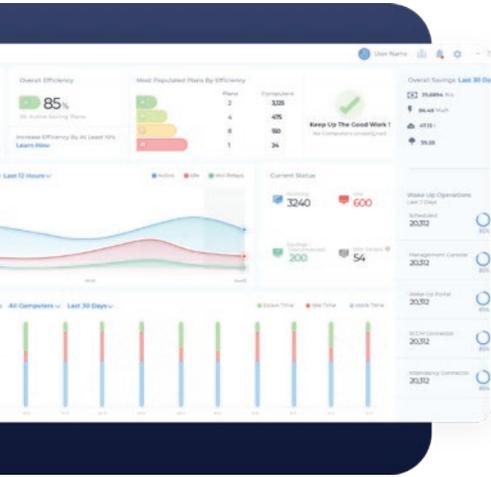

PowerPlug Pro is a highly effective PC power management solution for medium to large organizations.

PowerPlug

The Best PC
Power Management Solution On The Market

Save Millions Every Year

Our Platform is Capable of managing tens of thousands of PCs with a single server. PowerPlug Pro leads to significant energy saving without affecting employee productivity or disrupting day-to-day IT operations. PowerPlug Pro is successfully working on hundreds of thousands of computers in large enterprises, saving them millions every year. Our customers come from a variety of verticals including healthcare, universities, banks, insurance companies, government agencies, and more.

Key Features

Customized Power Policies

PowerPlug Pro allows creating customized Power Policies that are tailored to your employees' work and PCs activities.

Define the exact conditions for both work and non-work hours and assign each group of computers its designated policy.

Scheduled and On-Demand PC Wake UP

IT technicians can define scheduled wake-ups for maintenance activities and wake-up PCs on-demand for service operations or remote access.

IT Operations

PowerPlug Pro seamlessly integrates with Microsoft Active Directory, Attendance Systems and software distribution systems to streamline administration and increase software distribution jobs success rate.
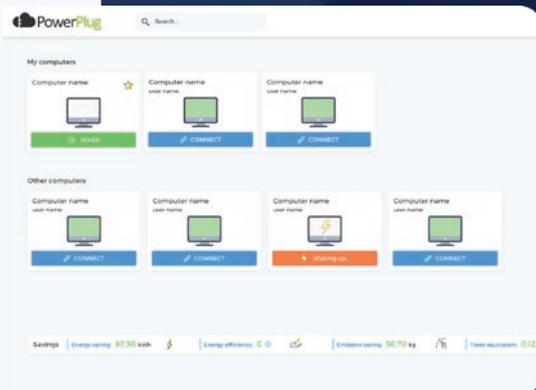

Banks, Insurance Companies, Healthcare Providers, Government Agencies and more

PC Wake Up

PowerPlug Pro enables End-Users and IT technicians to securely wake up and connect to the computers they are allowed to access with a single mouse click. These wake-up capabilities ensure that power saving does not interfere with End-User productivity or IT manageability..

End-Users

Using a designated Wake Up Portal, an End User can easily wake up her / his computer from home or a remote office. Wake-up is available for any power state: Sleep, Hibernate or Shutdown.

No Hustle

Patented Wake-on-LAN Mesh technology allows waking up every PC, across complex networks and multiple subnets, without compromising security or any configuration changes.

Powerful Remote Control

An IT technician can wake up a single computer for remote maintenance, a group of computers, or the entire computer fleet according to assigned permissions.

Key Benefits

Easily Track & Trace **Power Consumption**

Extensive out-of-the-box reports on power consumption, savings potential, actual savings achieved, carbon footprint reduction and much more...

PowerPlug Pro helps organizations with as few as 100 PCs and as many as 50000 PCs. Save money from day one and achieve a full return on investment in as low as 4 months.

Return on Investment **in Just 4 Months**

Effective & Intuitive Setup

Intuitive setup and fast client distribution make PowerPlug Pro up and running in hours.

Power generation is still a polluting activity, unfortunately. By saving power, PowerPlug Pro reduces your organization's carbon footprint and protects the environment.

Saving Electricity **Means Saving the Environment**

There is no energy source more sustainable and affordable than the one you do not use
